

108-H

ADV Machinery

108-series

多工位行星圆管抛光机

Multi-station planetary pipe polishing machine

产品功能和特点

Product functions and features

- ★ 多头设计支持同时对多个管材进行抛光和拉丝处理，满足大规模生产需求
Multi-head machines are capable of polishing and brushing multiple tubes, suitable for large-scale production needs
- ★ 配备自动送料装置，可连续将管材送入抛光区域，提升效率
Equipped with an automatic feeding system for continuous delivery of pipes into the polishing area, enhancing efficiency
- ★ 集成自动控制系统，实时监控各工作头状态及参数，便于故障排查与维护
Integrated automatic control system monitors the status and parameters of each working head in real time, facilitating troubleshooting and maintenance
- ★ 可根据不同长度和直径的管材灵活调整各工作头参数，适应多样化加工需求
The working head parameters can be flexibly adjusted according to pipes of different lengths and diameters to meet diverse processing needs
- ★ 可根据客户需求组合工位数量
The number of workstations can be combined according to customer needs

基本参数
Basic parameters

有效抛光直径 Effective polishing diameter	5-120mm (0.2"-4.7")	砂带尺寸 Abrasive belt size	940*50mm (37"*2")
有效抛光长度 Effective polishing length	1000-12000mm (39.4"-472.4")	适用打磨方式 Applicable polishing methods	干式, 湿式 Dry type, wet type
表面粗糙度 Surface roughness	Ra≤0.15um	磨头数量 Number of grinding heads	1-6

成品
Finished Product
