

506-series

# 震动纹研磨机

Vibration Finishing machine

## 产品功能和特点

Product functions and features

- ★ 可实现不同装饰纹路，无盲区加工  
Can realize different decorative patterns, no blind area processing
- ★ PLC系统，全自动轨迹规划  
PLC system, fully automatic trajectory planning
- ★ 磨头结构优化，耗材使用寿命长  
The structure of the grinding head is optimized and the consumables have long service life
- ★ 取代人工，高效且操作简易  
Replace manual labor, efficient and easy to operate
- ★ 独创专利机型，技术代际突破  
Original patented model, technological breakthrough between generations

BEST OUALITY  
ADV MAKING

基本参数  
Basic parameters

|                                         |                                                      |                                |                    |
|-----------------------------------------|------------------------------------------------------|--------------------------------|--------------------|
| 有效抛光宽度<br>Effective polishing width     | ≤1500mm<br>(≤59.1")                                  | 砂轮尺寸<br>Grinding wheel size    | Φ300mm<br>(Φ11.8") |
| 有效抛光长度<br>Effective polishing length    | 3000/6000mm/customized<br>(118.1"/236.2"/customized) | 控制系统<br>Control System         | PLC                |
| 有效抛光厚度<br>Effective polishing thickness | 1-3mm<br>(0.04"-0.1")                                | 工位数量<br>Number of workstations | 1/2/3              |
