

118-series

# 金属表面打磨机

Sheet metal surface grinding machine

## 产品功能和特点

Product functions and features

- ★ 适用于小平面金属板材，方管，小零件去毛刺、拉丝、抛光  
Suitable for deburring, brushing and polishing of small flat metal sheets, square tubes and small parts
- ★ 桌面级:体积小、重量轻、噪音小，支持工作室/家庭场景  
Desktop level: small size, light weight, low noise, suitable for studio/home scenes
- ★ 兼容砂带和抛光轮，耗材更换便捷  
Compatible with abrasive belts and polishing wheels, consumables can be easily replaced
- ★ 配备夹具或者特殊传送带，轻松应对工件尺寸较小零件  
Equipped with fixtures or special conveyor belts to easily handle parts with smaller workpiece sizes
- ★ 支持多工位设计，可配备集尘器使用  
Supports multi-station design and can be equipped with a dust collector

**基本参数**  
Basic parameters

|                                          |                           |                                  |                                               |
|------------------------------------------|---------------------------|----------------------------------|-----------------------------------------------|
| 有效加工宽度<br>Effective processing width     | 10-150mm<br>(0.4"-5.9")   | 砂带尺寸<br>Belt size                | 920*100/920*150mm<br>( 36.2"*3.9"/36.2"*5.9") |
| 有效加工厚度<br>Effective processing thickness | 0.5-80mm<br>( 0.02"-3.2") | 砂轮直径<br>Grinding wheel diameter  | 120mm<br>( 4.7")                              |
| 进料速度<br>Feeding speed                    | 1-8m/min                  | 磨头数量<br>Number of grinding heads | 1-3                                           |
