

408-series

轮毂抛光机

Wheel hub polishing machine

产品功能和特点

Product functions and features

- ★ 可以去氧化皮、研磨至高镜面光洁度，覆盖轮毂内外曲面
Can remove oxide scale, grind to high mirror finish, cover the inner and outer curved surfaces of the wheel hub
- ★ 工件直径范围：12"-36",可根据尺寸定制机型
Workpiece diameter range:12"-36", can be customized according to size
- ★ 工作效率高，5分钟即可打磨成镜面
High working efficiency, it can be polished into a mirror surface in 5 minutes
- ★ 配备了精确的速度调节装置和力度控制系统，确保每次抛光都能达到最佳效果
Equipped with precise speed adjustment device and force control system to ensure the best polishing effect every time
- ★ 优化更换物料磨头设计，节省更换时间
Optimize the design of grinding head for material replacement to save replacement time

基本参数
Basic parameters

轮辋直径范围 Wheel rim diameter range	300-900mm (11.8"-35.4")	机器尺寸 Machine size	2200*1800*1600mm (86.6"*70.9"*63")
转盘速度 Turntable speed	1-30rpm	抛光材料 Polishing materials	抛光轮和抛光蜡 Polishing wheels and polishing wax
抛光轮尺寸 Polishing wheel size	300*50*32mm (11.8"*2"*1.3")	电机功率 motor pouer	4kw
